

# Orbital welding (Closed heads) - Accessories

NEW

✓ SATFX-52

Product Code	Description	Net weight	Dimensions
SSEDX	Offset electrode support	0.008 kg	150 x 210 mm

**Remote** electrode holder for  $\varnothing 1.6$  mm and  $\varnothing 2.4$ mm electrodes:

The SSEDX accessory allows a lateral displacement of 2 to 6.5mm from the original position which allows for the welding of short elbows for example.

If you use this system, the usable diameter range of the tube is reduced:

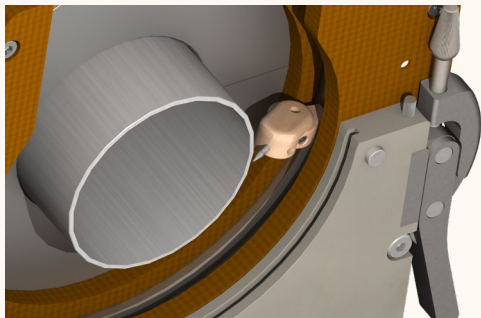

Machine	$\varnothing$ min	$\varnothing$ max
SATFX-52	6 mm	43 mm
SATFX-76	6 mm	67 mm
SATFX-115	12 mm	107 mm

See consumables to find the electrodes required for its use.

Product Code	Description	Net weight	Dimensions
SSEIX	Inclined electrode holder	0.015 kg	150 x 210 mm

**Inclined** electrode holder for  $\varnothing 1.6$  mm and  $\varnothing 2.4$ mm electrodes:

The SSEIX accessory allows the electrode to be tilted from  $0^\circ$  to  $45^\circ$ , which makes it possible to produce angle welds (flange welds or other accessories).

If you use this system, the usable diameter range of the tube is reduced:

Machine	$\varnothing$ min	$\varnothing$ max
SATFX-52	6 mm	28 mm
SATFX-76	6 mm	52 mm
SATFX-115	12 mm	92 mm

See consumables to find the electrodes required for its use.
